

# BARRISOL® Ecology

At the time where ecological awareness becomes stronger, Barrisol Normalu SAS develops and consolidates its environmental management efforts.

M. Jean-Marc Scherrer (Director) and M. Fernand Scherrer (Chairman) welcome M. Haege, one of our Barrisol dealer who came to Kembs to drop off a dozen of old sheets

But where do the old sheets come from?

As a responsible corporate entity Barrisol is engaged to take back old Barrisol sheets to recycle them. Thus, a specific procedure establishes certain conditions to respect: Dismounted by a Barrisol installer, the sheets without rubbles or stains could

be returned to the company and then follow the recycle process.

Our way to sensitize our customers with the respect of the environment is to implicate them in a participative step in order to share together the values of tomorrow.

The Barrisol environmental policy continues to be developed. Indeed, the new line Les Recyclés® has just been marketing. These sheets are manufactured with old sheets and can be recycled.

Project example with a recycled Barrisol stretch ceiling.

## Our keys Numbers

- Member of the club of world leader in international exports
- + 20 million euros of turnover
- + 40 years of experience
- 5 production sites (20 000 m<sup>2</sup>)
